

INTRODUCING

# Neigh-Lox<sup>®</sup> **ADVANCED**

Support your horse's digestive tract  
from beginning to end

## Gastric buffer and coating agents

- Buffer excess gastric acid
- Encourage the healing of damaged tissues

## Saccharomyces boulardii

- Decreases the risk of hindgut upset and acidosis by increasing digestion of starch and sugars in the foregut
- Accelerates healing of stomach and colonic ulceration by supplying nutrients to the gastrointestinal tissues
- Reduces or eliminates episodes of acute and chronic diarrhea

## Proprietary yeast fermentation metabolites

- Stimulate the immune response
- Reduce inflammation
- Supply polyphenol, nucleotides and polysterols; antioxidants that protect cell membranes and accelerate recovery after exercise
- Support the growth and activity of beneficial bacteria throughout the GI tract

## Neigh-Lox<sup>®</sup> **ADVANCED**

Sustains a healthy GI tract, which reduces the incidence of:

- Colonic irritation and ulcers
- Gastric ulcers
- Colic and laminitis related to hindgut acidosis
- Low immunity
- Oxidative stress and cell membrane damage

*Daily supplementation of Neigh-Lox Advanced is recommended. Continual support is the key to recovery and maintenance of a healthy digestive tract.*
